

ok boot -s

File to be modified in etc

ok vi /etc/passwd

ok vi /etc/nodename

ok vi /.netmasks

ok vi /defaultdomain

ok vi /defaultrouter

ok vi /etc/hostname.eri0

ok vi /etc/hostname.hme0 (If the workstation is using a single ethernet port)

ok vi /etc/hostname.qfe0 (If the workstation is using four ethernet port)

ok vi /etc/hostname.hme0:1 (If the workstation is using a single ethernet port)

ok vi /etc/hostname.qfe0:1 (If the workstation is using four ethernet port)

IMPORTANT

- Before editing /etc/hosts

ok chmod +w /etc/inet/hosts (If the hosts file is set to read-only. Then you will need to do this)

ok vi /etc/hosts
